

## Wiring Instructions Diagram For T8 LED Lamps

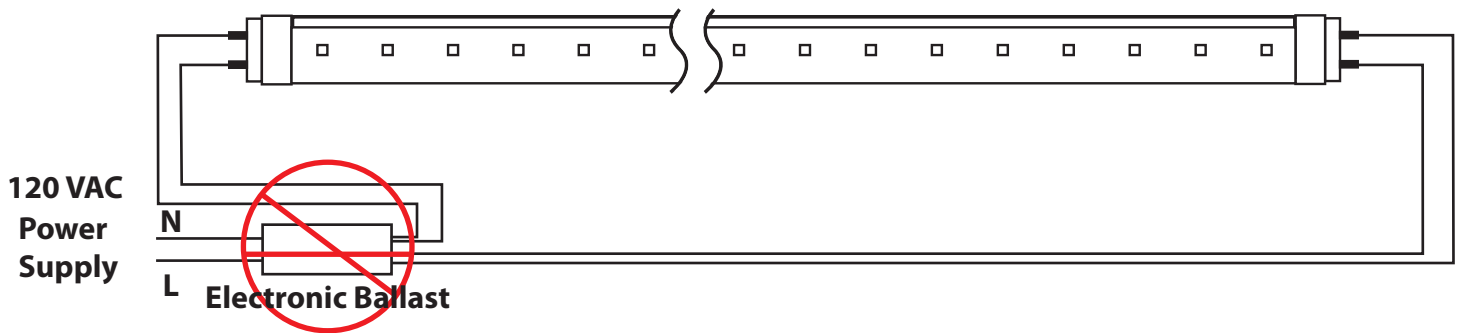

### Fixtures with magnetic/electrical ballast

Remove both ballast & starter on fluorescent fittings that have magnetic/electrical ballast & starter.

### Fixtures with electronic ballast

Fluorescent lights that come with an electronic ballast must be rewired to have the electronic ballast/starter removed.

### Proper Wiring

Connect the 120V live wire to one pin in the socket at one end of the troffer and connect the neutral wire to one pin in the socket located at the other end of the troffer.
